

PROGRAMMING INTERNSHIP IN FAST WEB TECHNOLOGIES

EVEREST Technologies, a quantitatively based financial management firm, has openings for programming positions.

Programming Opportunities

We are looking for a strong J2EE developer and designer to:

- Work and collaborate with software architects, systems engineers, information systems, and development teams to develop the data architecture strategy.
- Communicate recommendations and architectural designs to a broad constituency.
- Engage in design reviews as needed for architectural alignment.
- Produce complete, clear documentation for the architecture. Works with technology providers to ensure maximum leverage of their technologies.
- Research new technologies while keeping up-to-date with technological developments in relevant areas.

The ideal candidate will have:

- Bachelor's, Master's, or Ph.D. in Computer Science
- Strong J2EE/JSF/JBOSS skills
- Good knowledge of critical system design
- Significant experience in low level languages for web is a plus

We offer:

- Good compensation based on fix + bonus
- On the work experience and training in new technologies
- Intellectually vibrant work atmosphere
- Beautiful offices and facilities around our research & development center

Total expected per month compensation will range between €1 600 and €2 200, depending on background and experience.
